WALES

75

I joined the NHS when I started working at Health Education and Improvement Wales, (HEIW) in March 2022.

I love working with my team and promoting Healthcare Science. My role is very varied, but one that is rewarding. There is a great balance between administration and project management, and every day is different.

Throughout my day-to-day job, I enjoy providing generalised project support for my team. I have recently led a campaign called “Do They Know It’s Rehab” which promoted the great work of Rehabilitation across allied health professionals and healthcare scientists across Wales. I enjoy the creativity side of the role and designing new project materials to raise the profile of healthcare science. We have an avatar family, job profiles, a building on Careersville, a Twitter account and many more exciting digital projects.

There are some amazing opportunities within my role, such as meeting and networking with new stakeholders across the different health boards. I am a proficient minute-taker for the National Network and Boards along with being the first point of contact for the Programme.
